

Introduction

Barbora.lv is a popular online grocery store in Latvia, where shoppers can quickly order everyday products and get them delivered right to their door. The site offers a wide range of fresh food, household items and even basic pharmacy products. It's designed to make grocery shopping simple, fast and convenient, without having to visit a physical store.

Testing objectives

- Verify the correctness of shopping cart functionality
- Validate the accuracy and reliability of the user registration process
- Validate the log-in functionality
- Identify defects

Test technique

- Black Box testing
- Experience testing - due to lack of documentation

Functional testing

- Registration functionality
- Log-in functionality
- Shopping cart functionality

Non-functional testing

- Performance
- Usability
- Localization
- Reliability

Test level – System testing

What will be tested:

- Log-in functionality
 - Successful login with valid credentials
 - Handling incorrect passwords, invalid email formats and leading/trailing spaces
 - Verifying error message correctness and localization
 - Log-in speed

- Registration process
 - Completing a full registration flow with valid data
 - Validating all required fields and error handling when data is incorrect
 - Testing email format validation, duplicate email handling, and address field validation
 - Checking that correct and clear error messages are displayed to the user

- Shopping cart operations
 - Adding products to the cart from the product page and catalogue view
 - Modifying product quantities using buttons and manual input
 - Validating quantity input restrictions (letters, symbols)
 - Removing products and checking cart behaviour
 - Cart persistence after logout or language switch

Enviroment

All testing will be performed in a live environment

Devices and browsers

Mozilla/5.0 (Windows NT 10.0; Win64; x64) AppleWebKit/537.36 (KHTML, like Gecko)
Chrome/142.0.0.0 Safari/537.36

Test Deliverables

- Test plan as a PDF document
- Test scenarios and test cases as Excel document
- Testing result as a PDF document
- Defects report as Excel document
